DevOps Culture

Build from Zero to Hero

Estu Fardani - DevOps Consultant
estu@opensuse.id | @tuanpembual

DevOps Culture

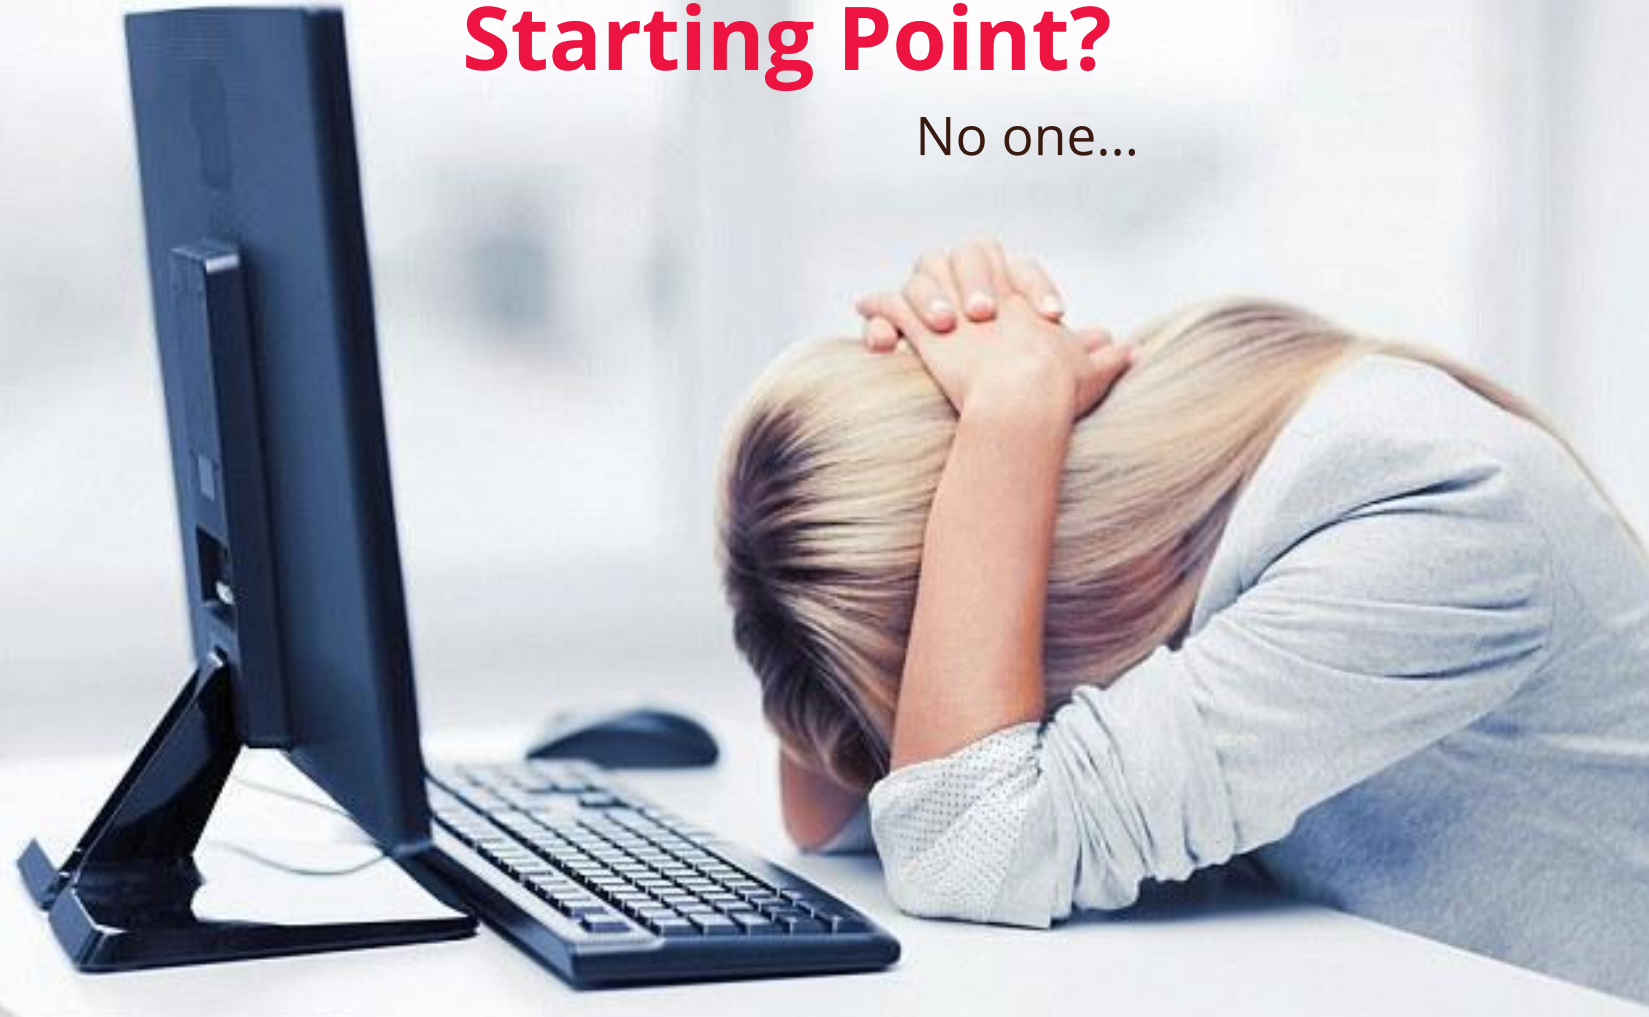

DevOps Culture is a set of principles which lay the fundamental groundwork of DevOps culture. The primary objectives of the DevOps methodology are to **speed up the time to market**, apply **incremental improvements** in response to the changing

Starting Point?

No one...

What **we** do?

From Zero?

Know your state, existing
Team, Teck, Stack, VM, Jobs

From Zero?

Visibility
Transparency
Documented

From Zero?

Break down the solutions.
How? what first?

NEW WAY:

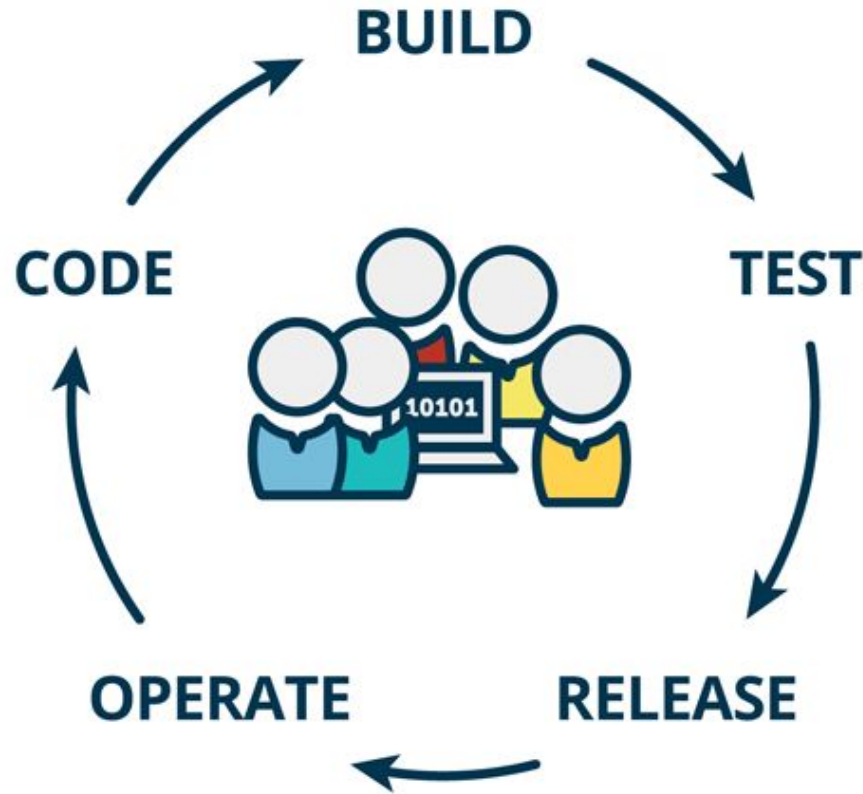

image: <https://www.mindtheproduct.com/what-the-hell-are-ci-cd-and-devops-a-cheatsheet-for-the-rest-of-us/>

Principle

Foster a Collaborative

Environment
Pairing
Feedback

Encourage Continuous Improvement

Time
Simple

Impose End-to-End Responsibility

See the problem, why am I here?
Set your goal, what your company expect

Principle

Automate (Almost) Everything

Let's Bot take over, less error
Build your cup of coffee

Focus on the Customer's Needs

Everything, if fun, do it

Embrace Failure, and Learn From it

Hard, very hard
Ngambing Item
Focus to cause

Unite Teams, and Expertise

Build, not poach, not own
Keep learn

Story

Success Story (1)

No SOP

Create it. stick to it, and improve
No personal request!
Create ticket. Write it clear! (title & content)

Spend Many Time

To communicate
Difference language
Difference time zone
Difference red tape

No Readme

We are magician
Write it, we are not forever it here.
Help yourself.

Afraid Prod Release

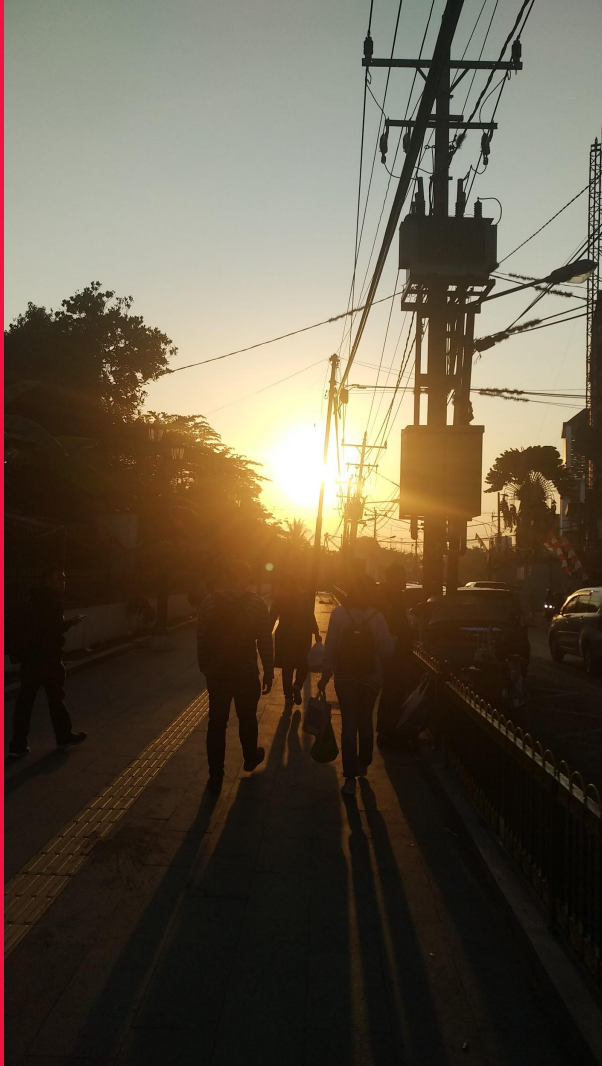

What if broken, what if fail, what if ...
Just release, find bug, and fix it

Success Story (2)

Afraid of change

Learn something new, it will help you
Talk something new, we will improve

Kamu tak sendiri~

QQT D

We are build the people. We are people.
Tech will always update. But we still need life.
~ Estu

Thank you!
